## SUMMARY

I am a simple but adventurous person, someone who wants more out of life. I love Music, I love nature, I love designing, creativity, brainstorming, problem solving and most of all I love Programming.

I am very passionate about Programming and how I can use it to develop my community, my nation and my continent, how I can use it to communicate with the younger generation And The world. Programming is not just a Job or activity, Programming is a culture, a lifestyle, a way of problem solving, and a whole new way of life.
